Preface

The emergency response plan for rainy season has been prepared by Lahore Waste Management Company (LWMC) to facilitate the discharge of storm water. The plan has been prepared through a consultative process with the field staff LWMC and WASA authorities. The major objective of the plan is to facilitate drainage of water by removing solid waste and silt from drains and to efficiently address emergency situations during monsoon. The plan intends optimum utilization of available resources of manpower, vehicles and equipment to achieve the desired results during rainy season.

In order to coordinate and facilitate smooth implementation of this plan, LWMC has established a control room which will be operational round the clock. Similarly, offices of the zonal officers are declared as emergency centres to respond as quickly as possible in the event of an emergency or rainfall.

During the implementation of this plan, LWMC will maintain close liaison with WASA and Regional Metrological Department. The plan's activities will be triggered by broadcasting alerts on the basis of weather situation. The protocols for control room and field staff has been illustrated in the plan. The area handed over to International Contractors M/s. Albayrak and M/s. OzPak will be managed by respective companies during the monsoon as per SOPs attached with this plan.

The emergency response plan of Lahore Waste Management Company (LWMC) will be operational from 10 June to 15 September 2016.

1. Background

Every year during Summer Monsoon the citizens of Lahore face the problems of water accumulation, choking of road/ street side drains. The problem has been aggravated for the last two decades. Natural storm water and wastewater drains and sewer obstructed by construction of new roads, plazas, building etc. and this haphazard/ weak infrastructure has reduced the water carrying capacity of drains. Water accumulation is correlated with rainfall intensity. High intensity rain during Monsoon season causes rainwater to accumulate at roads & streets.

The city of Lahore lies on extremely flat land. The highest point within city is about 700 ft above sea level. In the south-west, abutting the actual flood plain of Ravi River, the land falls to 682 ft. Gradients are extremely flat and fall of only 0.3 to 0.4 m per Km in many areas of the city which also favour the water accumulation during Monsoon season. The rainy season characterized by frequent monsoon bursts begins in July and extended to mid September. Typical rain fall pattern for Lahore is shown as follows:

Graph indicates that most of the rainfall 202 mm in July, 164 mm in August and 61 mm in September.

Lahore historical climatic data obtained from Pakistan Meteorological Office shows record rainfall of 825.5 mm in August, 1955. In the same way, the maximum rainfall during a year was 1317.5 mm in 1955. The historical climatic data of Lahore is given in table 1 as under:

Table: 1 Historical rainfall data of Lahore

Month	Heaviest Rainfall in mm (Year)
January	121.2 (1981)
February	509.0 (1934)
March	254.5 (1934)
April	141.0 (1983)
May	129.0 (1958)
June	208.6 (1996)
July	477.9 (1981)
August	825.5 (1955)
September	523.2 (1954)
October	155.0 (1985)
November	77.9 (1997)
December	111.8 (1967)

Solid waste dumped into drains is one of the reasons of water accumulation and choking of drains. LWMC has already started de-silting of storm & wastewater drains to address this issue.

2. Objective

- To facilitate the drainage by removing solid waste and de-silted material from drains.
- To efficiently address emergency situation during the monsoon season.

3. Duration of Plan

This plan will remain operational from *10th June to 15th of September 2016.*

4. Institutional Arrangements:

4.1 Establishment of Control Room

A control room will be established at LWMC head office, Shaheen Complex. The control room is equipped with computers, telephones, hotline, fax and wireless communication. The control room will remain opened round the clock with agile and responsible staff on duty. The control room will be supervised by planning department. The phone numbers are **042-99205153-55**. The fax number is **042-99205156**.

The information regarding weather alerts, update of the choking points and status of operations will be coordinated and disseminated from control room. Zonal offices at zone level will be declared as Emergency Centres and control room will remain in contact with Emergency Centres and all efforts will be made to promptly respond to urgency with no room for slackness. All the operations during monsoon will be managed and commanded through control room.

The Standard Operating Procedures (SOPs) for control room would be as under:

1. On receiving Alert/Warning

- a. Inform or broadcast message for all ZOs/AMs and Manager Operations LWMC
- b. Designated officer will take charge of control room
- c. Send alerts for completion of cleaning activities promptly
- d. Share and coordinate the warning with WASA
- e. Continuous coordination with regional Metrological Department.

2. On start of Raining

- a. Maintain contact with all emergency camps and designated staff on choking points.
- b. Coordinate with field staff so that all filled containers are lifted
- c. Collect update of choking points and maintain constant contact
- d. Coordinate and ensure that requisite number of workers and staff present
- e. Maintain contact with field formation and coordinate for provision of additional workers and equipment and vehicles.

After the rain

- f. Gather information of troubled areas, choking points, low lying areas, underpasses etc.
- g. Arrangements for sweeping of major roads by mechanical sweepers
- h. Acquire information about the visit of dignitaries
- i. Monitor that cleaning activities quickly completed before the onset of next rain.
- j. Get ready for next rain

4.2 Operational Mechanism of control room

The rainy season plan will be executed through a control room. The broader mechanism of flow of information is explained in the following diagram.

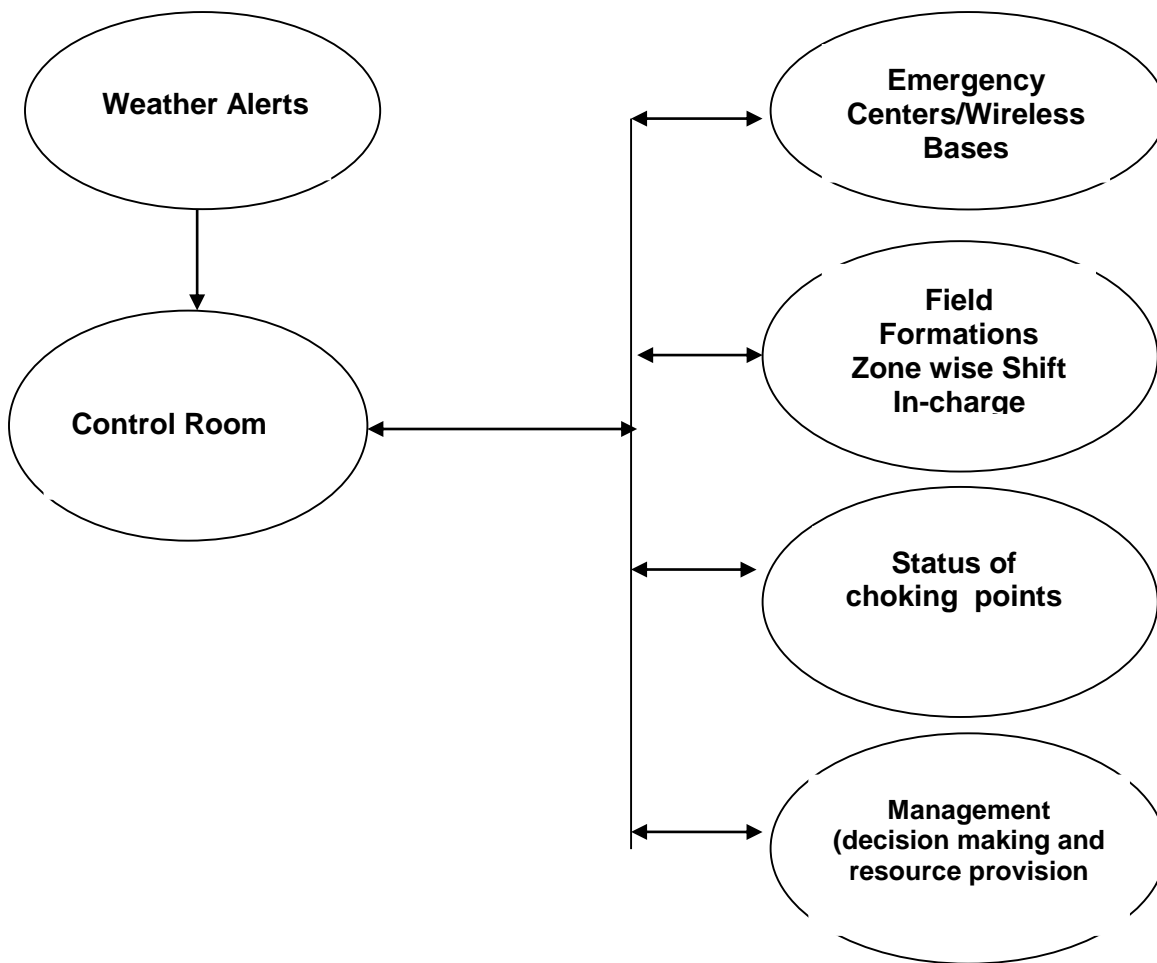

Figure: 1 Operational Mechanism of information in Control Room

The following staff is deputed in three shifts for rainy season at control room, shaheen complex office:

4.3 Liaison with Regional Meteorological Department

LWMC should make close liaison with meteorological department for online information sharing and rain alerts be will generated and issued to all towns on daily basis. Rain alerts are categorized as under:

a. Green Alert: light rainfall (drizzling)

- a. Workers are to wear raincoat and be in uniform
- b. Try to ensure that cleaning/sweeping activities completed before onset of rain.
- c. Make arrangements for lifting of filled containers.
- d. Make arrangements for lifting of open heaps or other wastes

b. Yellow Alert: moderate/medium rainfall

- a. Designated workers/staff should come out from streets and move towards choking points / roads/ low lying areas/emergency Centers
- b. All grating/drain openings should be checked and cleaned

c. Red Alert: heavy rainfall

- a. Place strainer in front of grating or drain openings wherever possible.
- b. Get ready to remove floating waste through nets and ensure that drains do not get chocked with solid waste.

4.4 Establishment of emergency centres:

Lahore Waste Management Company (LWMC) will establish 27 emergency centers within the office of zonal officer in all zones for rainy season which will remain functional 24/7 to meet any emergency.

Each Zonal Officer, Lahore Waste Management Company will be the in-charge of his respective zone and Asst. Manager (Operations) concerned will provide the technical guidance whereas Manager (Operations) will be the overall In-charge of all the emergency operations. The duty roster of centers/Centers is attached at **Annex 2**. The zone wise locations of emergency centers are as under: (Duty rosters for emergency Centers are annexed).

The staff will be deployed in each zone on choking points to facilitate discharge of storm water. The list of possible choking points is attached at **Annex 3**.

4.5 Deployment of man power

The normal working hours for field staff are from 6.00 AM to 2.00 AM. During this time sanitary workers perform their duties in their respective beats. However, during monsoon special arrangements are made to ensure the availability of workers and supervisory staff. After consultation with field formations, a day has been divided into three shifts;

- 6.00 AM to 2.00 PM (1st Shift)
- 2.00 PM to 10.00 PM (2nd Shift)
- 10.00 PM to 6.00 AM (3rd Shift).
-

The distribution of staff during three shifts will be as follows:

- 100% staff of each UC will remain present in first shift
- 600 (additional) staff will remain in second shift
- 600 (additional) staff will remain present during third shift.

The zone wise deployment of staff and list of designated points of third shift are indicated at **Annex 1**.

4.6 Deployment of vehicles

During rainy season, the vehicles will continue to carry out their scheduled duties. However, during second and third shift at least three vehicles i.e. Pickups & Mini Dumpers & Tractor Loader/ Compactor will be made available by the contractors (M/s. Albayrak & M/s. Ozpak) in each zone. The type of requisite vehicles will be decided on the basis of actual situation in the field.

4.7 Complaint Re-dressal System:

The services of complaint re-dressal system will remain available for 24/7. On receiving complaints with regard to water accumulation, choking of road/ street side drain or removal of de-silted material will be resolved within 1-2 hours¹.

4.8 Media Campaign

A media campaign will be launched to educate the masses of Lahore and message will be conveyed “Do Not Throw Solid Waste into Drains” and “Coordinate with LWMC Staff to Keep Lahore Clean”.
